

## 期末 Project 實作過程

### Step 3. 參數改為變數，並使用 useState 與迴圈(map)把 Swiper 圖片顯示出來

Code:

```
1 import React, { useState } from 'react';
2 import data from './swiper-data.js';
3 import './Swiper.scss';
4
5 function Swiper() {
6   const [item, setItem] = useState(data);
7
8   return (
9     <>
10       <section className="swiper-container">
11         <div className="swiper-wrapper">
12           {item.map((items) => {
13             const { id, remote_url, target, image } = items;
14             return (
15               <article key={id} className={position}>
16                 <a href={remote_url} target={target} src={image}>
17                   <img src={image} />
18                 </a>
19               </article>
20             );
21           })}
22         </div>
23       </section>
24       <div className="swiper-pagination">
```
